# Technical specifications

## CENTRAL DRIVE

Weely is an extremely handy wheelchair with a very short turning radius for moving about in a restricted space. Its design allows the user to move in an easy and efficient way, even with tilted seat. The central wheels are always well positioned and optimize the movement of the shoulders and arms.

The stability of WEELY is remarkable, even with a seat tilt of 35°. The harmonious adaptation of the seat to each propulsion mode reveals its unique character. The usual compromise between the resting and appropriate driving postures is outdated for the users of WEELY. Indoors, its suspended front and back wheels allow to cross small obstacles smoothly. Outdoors, its innovative frame allows the attendant to pass kerbs up to 13cm high.

## PODAL DRIVE

Thanks to its ergonomic design, the user can move in autonomy by podal or hand-foot propulsion.

## CONTOUR VERSION

In its Contour Version, the Weely is equipped with a positioning backrest structure, and a tension adjustable backrest that allows a perfect shaping of the user's back. It offers all functional specifications needed for particular posture equipment.

<b>Seat width</b>	<b>3 frames : 39cm, 44cm, 49cm Adjustable to +5cm</b>
<b>Overall width</b>	<b>Seat width +18cm</b>
<b>Seat depth</b>	<b>From 39cm to 51cm (continuous)</b>
