

CANOPY

Merits Luxury Mobility Scooter All Weather Canopy (With Polycarbonate front and rear Screen plus PVC top)

This Polycarbonate style canopy is top of the range. Manufactured with a rigid 2mm polycarbonate front and rear screen, and PVC top. This canopy offers all of the same benefits as the other styles, but with increased protection from the outside elements.

Made from PVC backed nylon, with large zippered roll up doors on both sides of the canopy for easy access either side. These doors have attachments at the top for keeping the door up if desired. With full windows at the back and the front, and window panels either side, visibility is not impaired, and scooter lights are still visible for use at night. In warm weather or none raining season, the PVC covers on both side can be removed.

Features

- Suitable for S846 range of Merits Mobility Scooters
- Quick and easy fastening
- Designed to protect the Mobility Scooter and the user from elements
- Transparent to maximize visibility
- Roof shields from sun glare
- Roll back doors or removable PVC side for increased airflow
- Optional reverse camera available

Roll back doors or removable PVC side for increased airflow
